

## Refrigerator Sanitizer with AOP technology

The Refrigerator Sanitizer and Food Life Extender is specially designed to be installed in commercial and walk-in-fridges. It will eliminate odors, kill bacteria and extends food shelf life up to 40%. Penetrating smells will not get on other fresh food products. Very easy to install; without any tools or modifications to your refrigerator. For fridges from 0,5 to 10m<sup>3</sup>. Low energy consumption, system only uses 2-10 Watt (depending on refrigerator size).

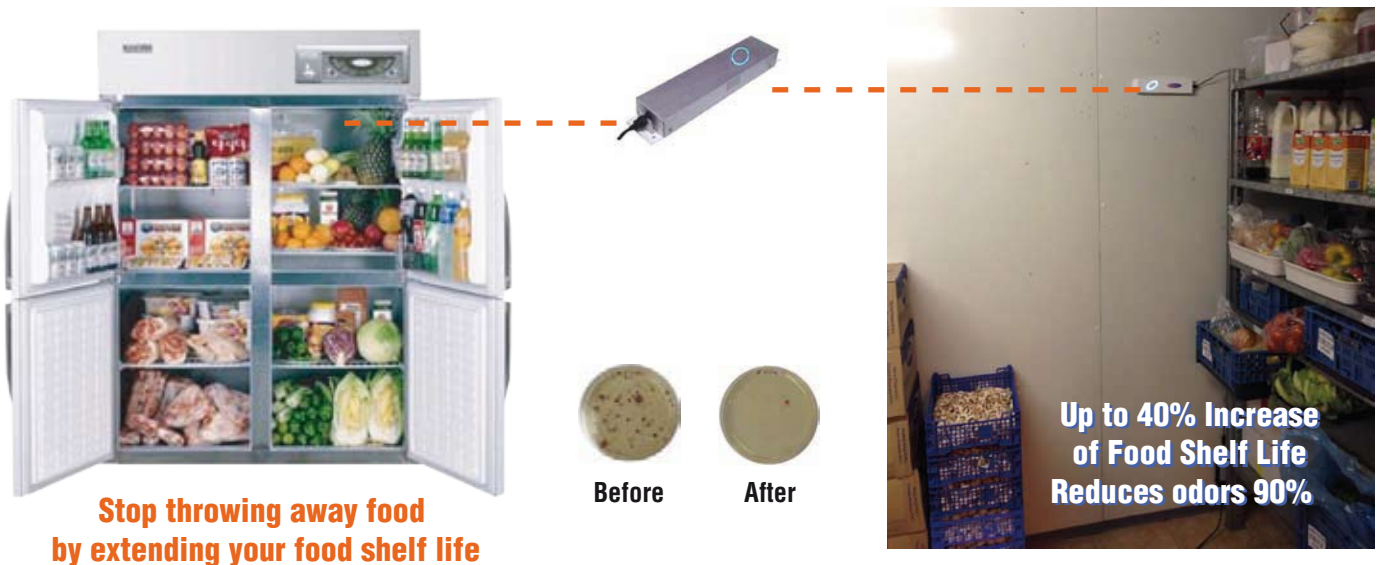

Also to be used for waste compartments to reduce bad odors.

## Why use Clean Air Europe AOP Technology ?

The Refrigerator Sanitizer and Food Life Extender creates an Advanced Oxidation Process for a continuous purification and a quick kill of newly introduced odors and microbials.

The unit produces: Hydro-peroxides, super-oxide-ions and hydroxide-ions. All are friendly oxidizers.

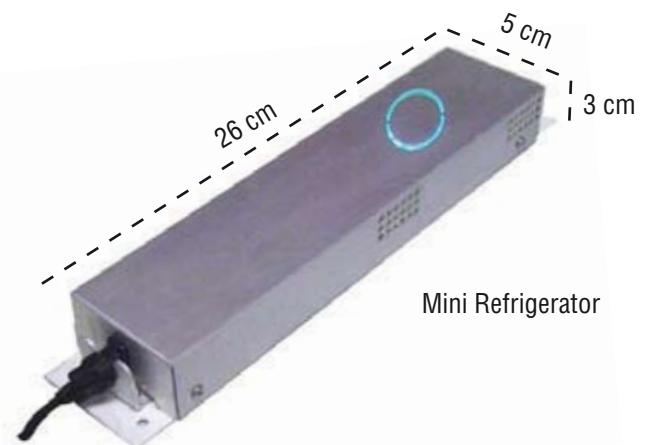

By friendly oxidizers we mean oxidizers that revert back to oxygen and hydrogen after the oxidation of the pollutant.

**Stop throwing away food  
by extending your food shelf life**

- You'll find more information on the AOP technology on a separate leaflet
- Micro-organisms can be reduced by over 99%. See testresults on our website:
